TRUE OMNICHANNEL COMMUNICATIONS.

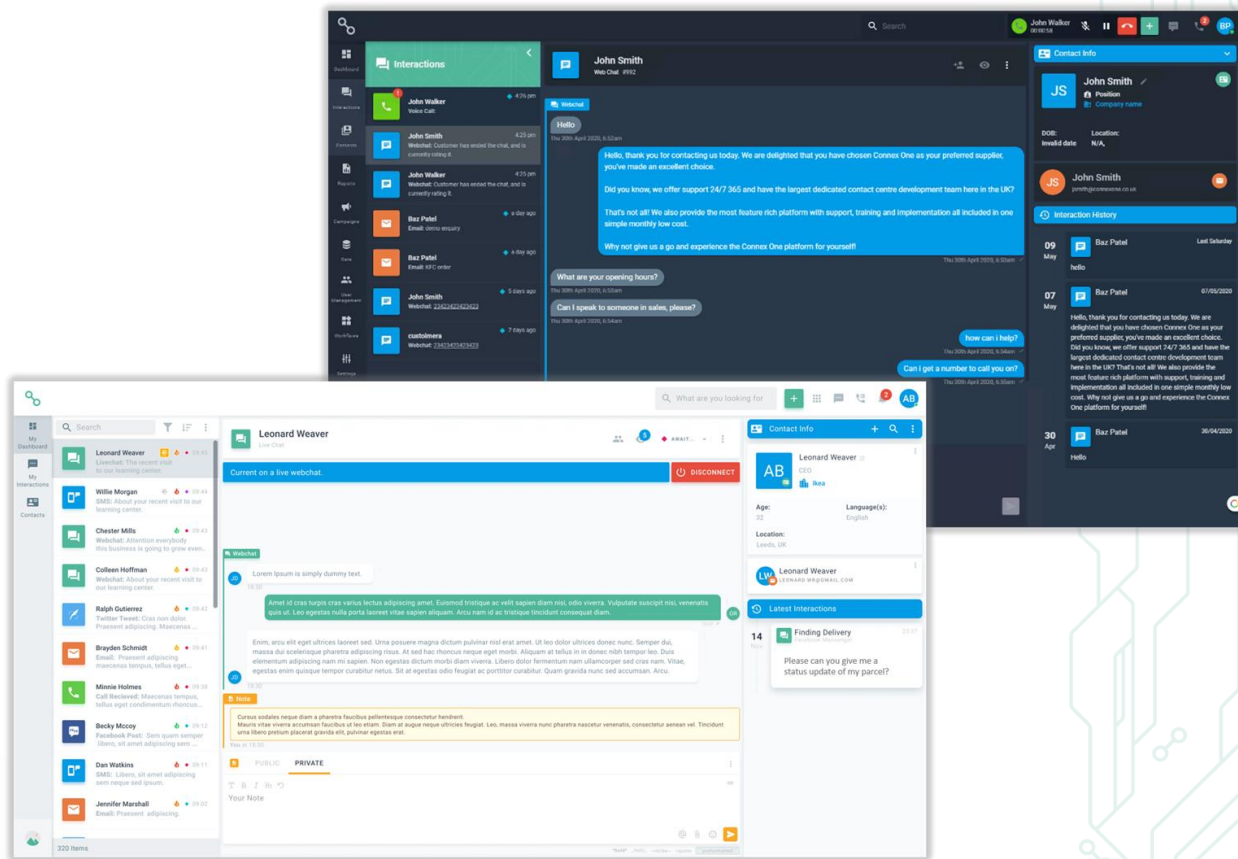

The Connex One platform enables organisations to handle interactions across phone, SMS, email, web, social and live chat.

TRUE OMNICHANNEL FOR CUSTOMER SUCCESS.

The Connex One omnichannel platform is flexible and versatile, encouraging both inbound and outbound customer interactions. By integrating seamlessly with your CRM systems, your agents can pick up the conversations where they left off, increasing the volume of tickets they can get through without decreasing the quality.

VOICE • EMAIL • LIVE CHAT • SMS • SOCIAL

Balance pace with piece of mind, give a greater personalised experience, with higher call & interaction volume.

PUT YOUR AGENTS IN FRONT OF LIVE CALLERS VOICE SERVICES

PREDICTIVE DIALLER

Get your agents in front of live callers even faster with our versatile dialler feature, combine service with sales volume through a smooth omnichannel approach.

INTERACTIVE VOICE RESPONSE

Using voice or the keypad, our advanced IVR features enable customers to quickly find the service and speak to an agent quicker.

SPEECH ANALYTICS

Analyse all your voice interactions to detect customer and agent emotions, identifying everything from upsell opportunities to positive/negative customer sentiment.

SMS FOR YOUR MOBILE CUSTOMERS

The Mobile feature has been purpose built for the modern smartphone user, enabling you to successfully deploy IVR, Forms, Surveys into a visually optimised app-like engagement.

Outbound and Inbound SMS communication enables you to proactively deliver promotional campaigns, offers and notifications and enable your customers to use text as a support channel.

A photograph of a person's hands holding a smartphone. A blue speech bubble is overlaid on the image, containing the text 'Hi! Your order will be with you today.' The background is blurred, showing what appears to be an outdoor setting with greenery.

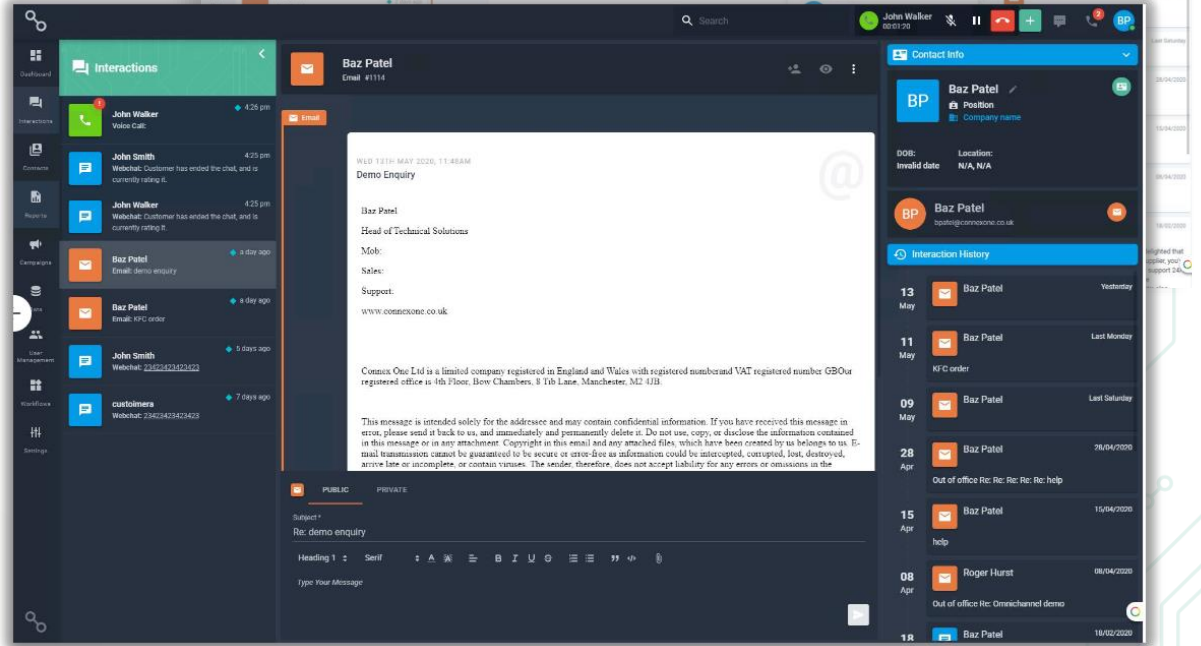

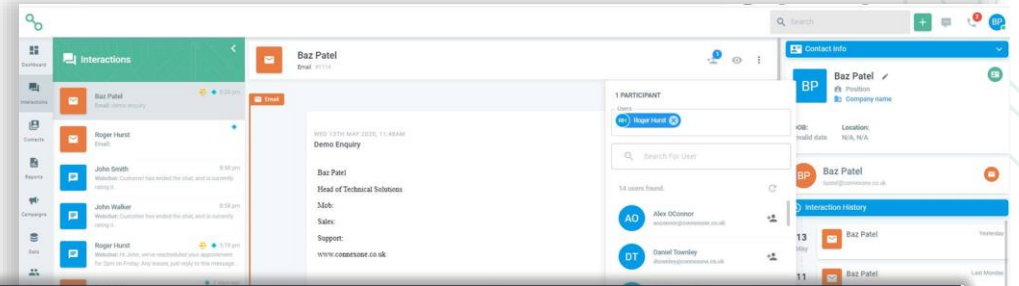

Hi! Your order will
be with you today.

PRIORITISE, ESCALATE,
ACTION.

INBOUND AND OUTBOUND EMAIL

The Email solution seamlessly integrates across all your customer contact channels for a single interface and logs all interactions in your CRM for a seamless journey.

Intelligent omnichannel routing features combined with dashboards and reports give detailed visibility into critical KPIs and SLAs to prioritise and escalate tickets.

GO FROM VISITORS TO CUSTOMERS

LIVE CHAT

Turn website browsing to buying by providing immediate answers to prospective customers. From prompting outbound questions nudging customers down the sales funnel to managing inbound customer service queries, Live Chat is a versatile tool that can deliver immediate ROI.

LEAD GENERATION

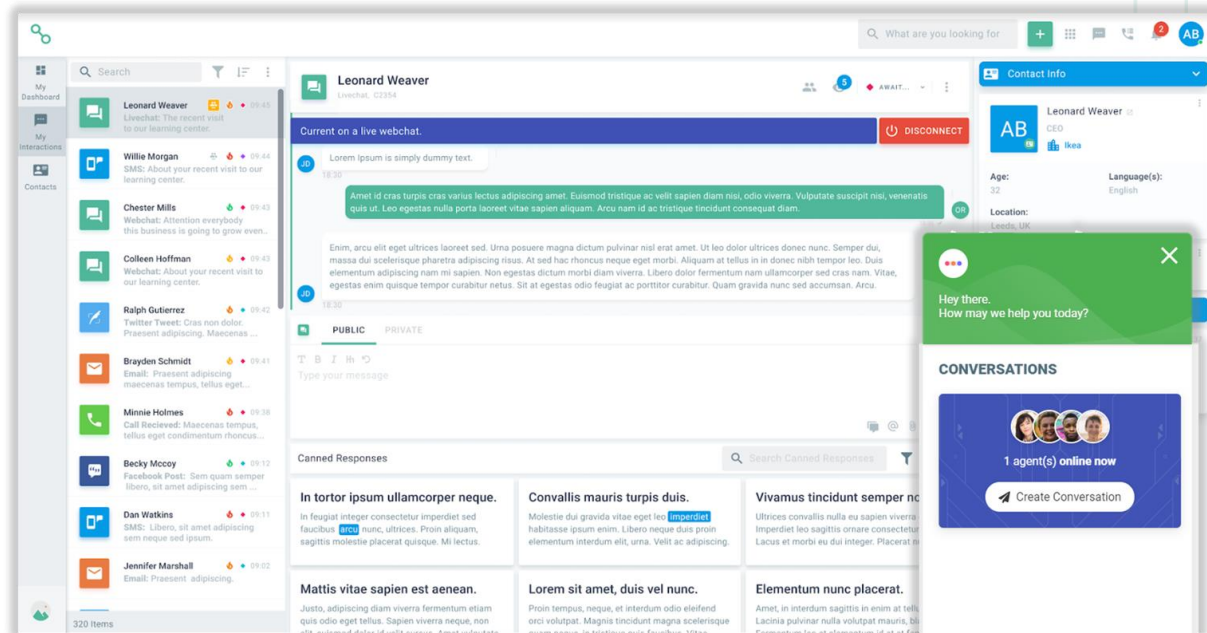

Prompt outbound messaging. You have thousands of web visitors, isn't it time to say hello?

INTEGRATION

Auto sync your conversation history to the customers account in your CRM to unify the user experience.

CUSTOMER SERVICE

Manage inbound messaging with clever automated ticketing to route the right queries to the right agent.

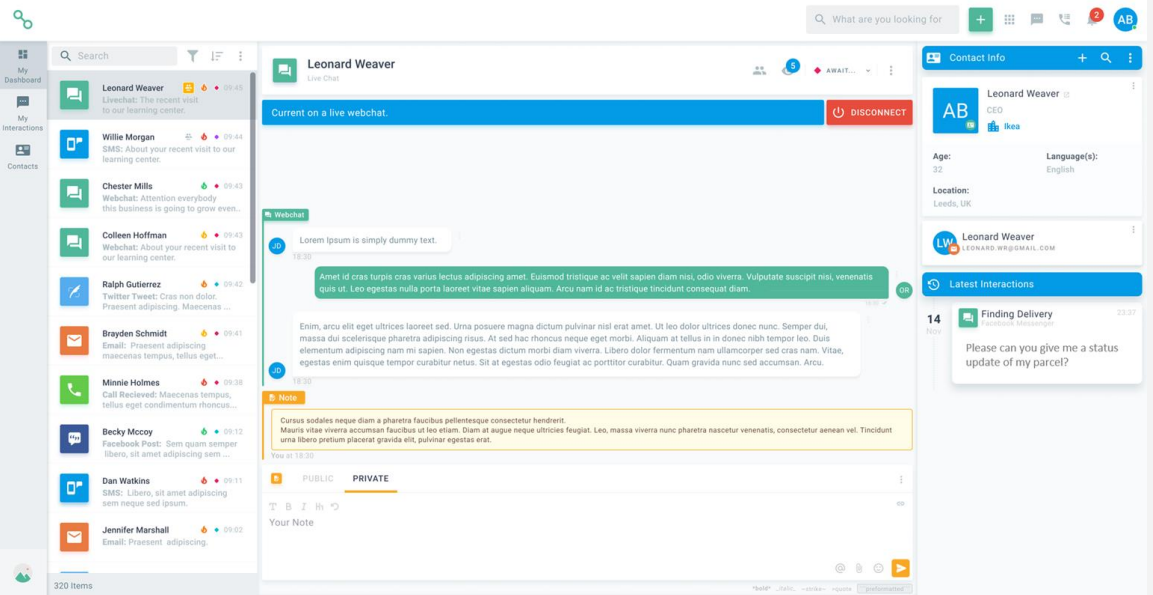

FOR YOUR CUSTOMERS ON THE MOVE

SOCIAL MEDIA

For many businesses, social media is the cornerstone in their communication strategy. Whether you use it for lead generation, marketing, customer services or branding, an Omnichannel solution can help to consolidate all your enquiries into one central point and distribute via social media platforms of your choosing.

For customers on the go it's important that you can keep up with the demand of modern life and communicate with them on their preferred channel, whether its Facebook, Twitter, WhatsApp or Instagram.

Easily send documents, files and links to your customers via social applications right to their mobile, tablet or desktop.

CONNEX ONE: DIALLER

DYNAMIC & PROACTIVE OUTBOUND CALLING

INCREASE YOUR TALK TIME BY 300%

**TRADITIONAL
MANUAL DIAL
TALK TIME**

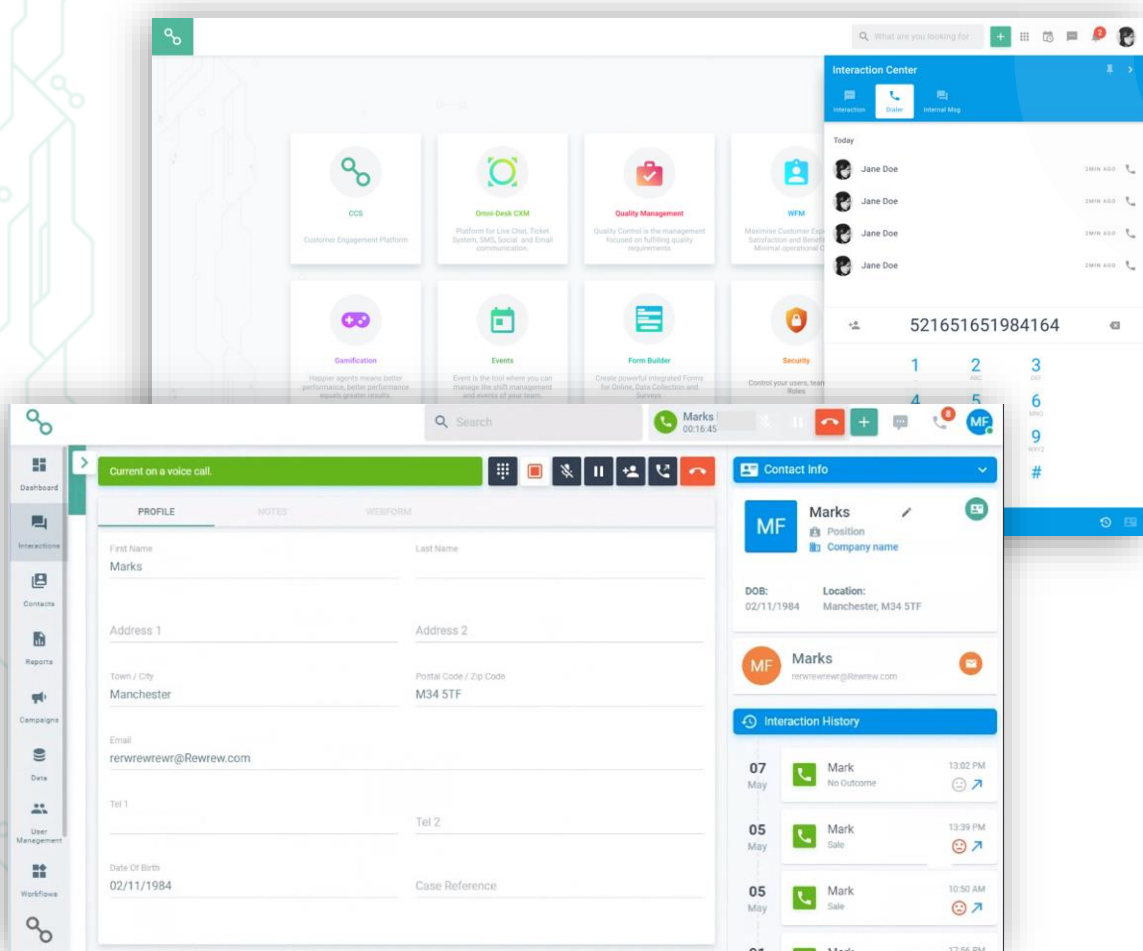

**CONNEX ONE
PREDICTIVE DIALLER
TALK TIME**

INCREASE CALL VOLUME PREDICTIVE DIAL.

Powered by intelligent algorithms adapting to customer behaviour to maximise your outbound call rate and increasing your connection volume through learned success.

Predictive dialling limits dropped calls with bespoke pre-recorded messages and clever workflow call routing.

This automated process to connect live callers with available agents is proven to increase your talk time by 300% when compared to manual dialling.

TARGETED AND PERSONALISED CALLS CLICK TO DIAL.

Whether you want to increase call volume or nurture customer journey, take your customer interactions to the next level with Connex One. Equip your agents with next-generation dialler technology to increase productivity, customer satisfaction and sales revenue.

Take the time to make educated calls where your agents can view background interaction history through intuitive CRM API technology to make personalised, targeted calls.

○ RELIABLE PRECISION DIALLING

Accurately predict agent availability and reattempt records with precision dial and alternate calling times.

○ INTUITIVE FILTERS

Filter out unproductive calls, such as no answers, voicemails, engaged and disconnected numbers for more accurate results.

○ PROACTIVE TECHNOLOGY

Powerful algorithms ensure compliance and can reduce wait time between calls to make it easier for your team to speak to ready customers.

○ INSIGHTFUL SPEECH ANALYSIS

Speech analysis and call recording give real-time insight into customer satisfaction.

**MANAGE THE EXPERIENCE
WITH FULL VISIBILITY**

AGENT PRODUCTIVITY

Our Platform gives your management team full visibility of agent productivity. Easily see real-time data at a glance or set up custom reports for detailed insights.

INCREASE
QUALITY

PREVIEW DIALLER

Preview Dial utilises campaign optimisation features, combined with optimum call pacing giving your agents realistic targets, ensuring they balance call volume with customer service.

PREDICTIVE DIALLER

Limit drop calls with prerecorded messages and clever call routing. Connecting live callers with available agents is proven to increase your talk time by 300% when compared to manual dialling.

INCREASE
VOLUME

CLICK TO DIAL

Take the time to make educated calls where your agents can view background interaction history through intuitive CRM API technology to make personalised, targeted calls.

PROGRESSIVE DIALLER

Advanced call pacing techniques only dial when an agent is available, keeping your agents busy and lower your call drop rates, as well as increasing your compliance.

DRIVE
SUCCESS

SQL DIAL

Segment your data into different lists and demographics to create highly targeted outbound campaigns. With list priority and dial percentage functionality, this intuitive feature is proven to increase your conversion rate.

SMARTQ

The automated workflow builder enables the creation of intelligent interaction queues, allowing you to implement SLA targets across all interaction types and predict customer satisfaction levels

IT'S YOUR CALL

CONNEX ONE: LOGICAL FORM DESIGNER

Create incredible user journeys your customers will love.

WHO NEEDS CODE?

LOGICAL SCRIPTS

Engage your agents with natural workflows complemented by powerful AI driven insights.

Our user-friendly design canvas is a simple way to create powerful forms. Drag-and-drop controls, combined with advanced business logic make it easy to customise your forms for all your business needs.

The screenshot displays a web-based 'Form Editor' interface. On the left, a sidebar contains navigation options like 'HOME', 'SHIFT MANAGER', 'Reports', 'Security', 'Form Editor', 'Data Sources', 'Integration', and 'Settings'. The main workspace is titled 'Form 1' and includes a search bar and a 'COMPONENTS' palette. This palette is organized into sections: 'Inputs' (Short Text Input, Area Input, Multiple Choice, Single Choice, Dropdown, Switch, Range, Multi Select list, Toggle Buttons, Time, Date & Time, Google Capcha, Input Table, Star Rating), 'Static' (Title Display, Text Display, Image Display, Row Grid), and 'Specials' (Paypal, Payment, Calculation, Lookup, Conditional Group, JS Script). The central canvas, labeled 'Page 1 of 1', shows a 'Logical Script' workflow. It begins with a 'Title Display' component, followed by an 'If' condition (e.g., 'if [email] == [value]'). Depending on the condition, it branches into different paths: one leading to a 'Short Text Input' field, another to a 'Date' field, and a final 'END' node. Below the script, there is a 'SUBMIT' button and a 'Success Page' with the text 'THANK YOU FOR YOUR SUBMISSION' and a 'Reloading in 3s' indicator.

INSTANT NOTIFICATIONS

With powerful API technology, you'll get instant alerts when someone fills in your form which is then automatically mapped to the agent best suited to answer the query.

ACQUISITION DATA

Not only can you get a clear idea where your leads come from, but our reporting suite can tell your form's page views, conversion rates, error score, and a lot more.

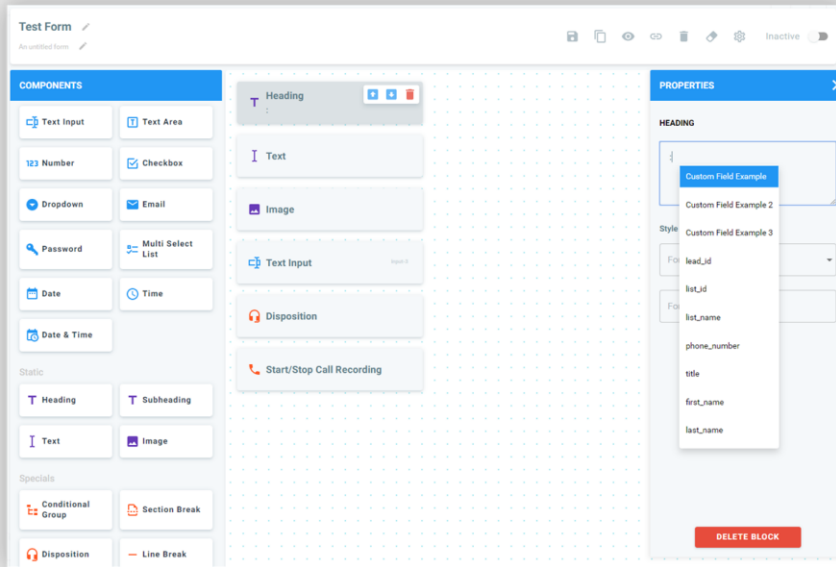

IMPROVED CUSTOMER EXPERIENCE

Not only can you speed up the time that a customer gets a response, but you can respond with increased precision by knowing exactly what they need.

ACCURATE DATA DRIVEN INSIGHTS

BENEFITS OF USING FORMS

The Form Designer isn't a one way street of inbound information coming in, its an intuitive way to learn more about your customers and refine what you do.

- **AUTOMATED TASK MANAGEMENT**
Send alerts, launch escalations and begin approval process directly from form fills.
- **INSTANTLY CORRECT ISSUES**
Generate action plans with escalation points and immediate corrections at the end of forms.
- **DEFINE CUSTOM WORKFLOWS**
Set up workflows that automatically assign follow-up tasks based on specific responses and form scores.

AUTOMATED ENTERPRISE FORM SOLUTIONS

QUALITY CONTROL FORMS

Streamline and refine existing processes with Quality Control Forms. Follow up completed forms with alerts, prompt approval processes, and launch escalations.

Managers can have a clear view on workloads by attaching custom statuses and deadlines to outstanding tasks, then automatically send reminders about upcoming deadlines.

CAPTURE THE INFORMATION YOU NEED

WEBSITE FORMS

Convert more website visitors into customers with bespoke designed forms that are simple to set up and fill out.

Apply preset or custom business rules to build dynamic forms that respond based on user input. Conditional formatting and validation allow end-users to see only the fields they need to fill out, ensuring the right information is collected the first time around.

- **NO CODE NEEDED**
Simply drag and drop the features you want, while sophisticated scripts run in the background to bring powerful data capture screens to life.
- **INTEGRATION WITH EXISTING SYSTEMS**
Connect to external data sources and Plugins with ease when building, which sync up workflows to your CRM and ticketing system.
- **CONDITIONAL LOGIC**
Build in auto-responses or conditional logic to guide your agents into having productive conversations and a highly personalised user experience.

INFORMATION CAPTURE SHEETS

CUSTOMER DATA

Our Form Designer will do the hard work for you. Equip your agents with the full context of the customer journey and interaction history, enabling educated and precise intervention.

Create the form you want in minutes with effortless drag-and-drop data fields powered by intuitive API routing.
